PROFESSIONAL SUMMARY

Senior Data Analyst with 4+ years of experience across e-governance and school-education analytics, supported by applied data science and machine learning project experience. Strong in Python, SQL, Power BI, Excel, EDA, data quality, stakeholder collaboration, and predictive modeling. Analyzed 1M+ student records across 38 districts and independently built an XGBoost higher-education recommendation prototype on 794,908 profiles.

TECHNICAL SKILLS

Data Analytics: Python (Pandas, NumPy), SQL, Advanced Excel, Power BI, EDA, KPI Reporting

Data Science & ML: scikit-learn, XGBoost, Classification, Regression, Feature Engineering, Model Evaluation

Data Management: Data Cleaning, Validation, Transformation, MySQL, SQLite, SQLAlchemy

Visualization & Apps: Power BI, Streamlit, Matplotlib, Seaborn

Business & Delivery: Stakeholder Collaboration, Requirement Analysis, UAT, Root-Cause Analysis, Decision Support

PROFESSIONAL EXPERIENCE

The Zigma Technologies India (P) Limited | Payroll Employer for Both Client Assignments

Data Analyst - Career Guidance | TN Model Schools, Department of School Education

Jun 2024 - Jun 2026

- Analyzed 1M+ student records across 38 districts to identify attendance, academic-performance, pass/fail/absent, admission, and progression patterns.
- Integrated and validated UMIS, admissions, and survey data for Class 12 students; delivered counselling, seat, vacancy, and 7.5% quota analyses.
- Automated recurring Power BI and Excel reporting workflows, reducing manual reporting effort by 30% and improving decision-ready reporting for education stakeholders.

Assistant System Engineer (Data Analysis & Project Coordination) | Tamil Nadu e-Governance Agency (TNeGA)

Nov 2021 - May 2024

- Collaborated with government stakeholders and project teams to understand citizen-service workflows and translate reporting needs into data definitions, report logic, and validation rules.
- Queried, reconciled, and validated operational data using SQL and Excel for claims, enrollment, and authorization workflows; produced KPI, quality, exception, and status reports across 10+ e-governance initiatives.
- Supported UAT, defect analysis, and release readiness by validating outputs, identifying data issues, tracking trends, and communicating findings to delivery teams.

DATA SCIENCE & ANALYTICS PROJECTS

Higher-Education Student Outcome Classification & Recommendation Prototype (XGBoost)

Prepared 794,908 student profiles and 75 model features; trained an XGBoost classifier for Passed, Failed and Absent outcomes, achieving 99.4% accuracy and 0.978 macro F1. Separately developed a Streamlit prototype for academic-stream and course recommendations.

Uber Eats Restaurant Analysis (SQL Application)

Cleaned 23,193 restaurant records, created 15 reusable MySQL analyses and delivered a Streamlit question-and-answer interface.

Enterprise Retail Intelligence (Demand Forecasting)

Engineered 64,700 rows for 100 products; compared CatBoost, XGBoost, LightGBM, LSTM and baselines, then delivered results in Streamlit.

CryptoCast Bitcoin Forecasting (Deep Learning)

Built 60-day-to-7-day forecasts from 4,999 observations; benchmarked persistence, CNN, SimpleRNN and LSTM recurrent models.

IMDb Movie Recommendation System (NLP)

Cleaned 4,212 films and generated 10,250 TF-IDF features for cosine-similarity recommendations in a Streamlit application.

CERTIFICATION

GUVI - Master Data Science Program: Python, SQL, Statistics, Machine Learning & Power BI | 2026

EDUCATION

B.Tech - Information Technology | M.A.M College of Engineering & Technology | 2019
